LUBRICANTS <sup>TM</sup>

## PRODUCT CATALOGUE

**Australian Owned and Manufactured Lubricants  
for Australian Conditions**

## 350g - Z001 20L - Z002 Electrical Contact Cleaner

Safe efficient cleaning of critical surfaces & connections  
A precision cleaning solvent FAST DRYING rapid evaporation of this high purity, highly refined solvent, ensures safe, effective cleaning of sensitive electronic componentry & fine precision engineered mechanisms.

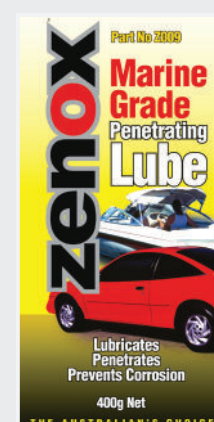

## 500ml - Z003 20L - Z004 Brake & Parts Cleaner

Zenox Brake and Parts Cleaner is a specially formulated product that removes brake fluid, oil, grease and other brake contaminants from brake drums, linings, pads, cylinders and springs. It can be applied without disassembling brakes. Stops disc brake 'squeal'. Can be used to clean parts, chains and slides.

## 400g - Z009 20L - Z010 Marine Grade Penetrating Lube

Zenox Penetrating Lube is specially formulated to displace moisture and lubricate the treated areas. Its penetrating action and anti corrosion protection makes it ideally suited for most uses. It starts engines quickly, frees rusted parts and gives maximum protection against moisture.

## 1L - Z032 20L - Z030 Monkey Goo Cable Lubricant

Reduces the risk of wires and cables from damage when pushed through conduit.

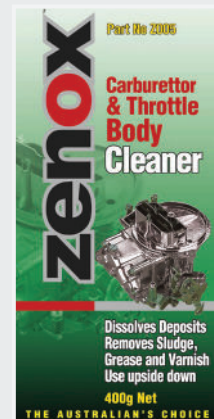

Superior friction reduction, leaves no residue, non-toxic, non-flammable and environmentally safe.

## 400g - Z005 20L - Z006 Carburettor & Throttle Body Cleaner

Zenox Carburettor & Throttle cleaner quickly loosens and removes oil, varnish, sludge, grease, gum, lead and carbon deposits.

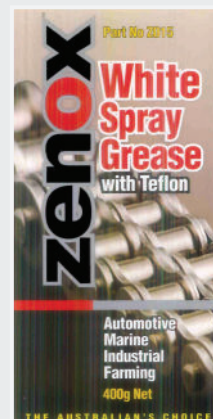

It dries without leaving a film. Will not harm catalytic converters or oxygen sensors. Helps cure rough idle and provides smoother performance.

## 400g - Z015 White Spray Grease

Zenox White Spray Grease with Teflon is an advanced formula incorporating a high purity grade 2 lithium grease with PTFE (Teflon). A smooth lubricant for equipment with moving parts. It resists heat and moisture, inhibits corrosion.

Use on bearings, bits, cables, cams, chains, dies, door slides, engines, gears, hinges, latches, locks, motors, pistons, roller doors, slide conveyors, tautliners, tools, valves, wheels, etc.

## 250g - Z056 Pop-Up Lube

Zenox Pop-Up Sprinkler Lube is formulated to prevent pop-up sprinklers "sticking" and prolong working life by preventing build up of calcium, dust and other contaminants on sliding parts. It protects seals and "O" rings. The lubricant is colourless, non toxic, water proof and highly resistant to penetration by salt and bore water. Provides outstanding lubrication and protection in all weather conditions. The protective barrier will not adhere to calcium, dust, grass or sand build up in sprinkler heads. Safe on all plastics, polycarbonates, metals, solenoid valves, pvc manifolds "O" ring type, electrical components and connections.

## 350g - Z007 20L - Z008 Silicone Plus Lube

1. Shines - Imports gloss to plastics, metals.
2. Lubricates Without Wetting - E.g. Print guillotines Feed tables (paper, fabric, canvas) Stops squeaks on metal, plastics & glass with a clear finish.
3. Waterproofing - For use in most waterproofing situation. It is non corrosive.
4. Anti Static - Breaks static dust attraction cycle. Suitable for fabric.
5. Penetrates - Plastic joints, wires & threads.
6. Release Agent - Stops plastic, glass, wood sticking. E.g. mold release

## 400g - Z020 Food Safe Superior Lubricant

Zenox Superior Lubricant is a specially formulated ultra-pure fully synthetic food safe lubricant with micron size PTFE allowing penetration into intricate mechanisms reducing friction and wear and preventing rust and corrosion. After evaporation, a clean, non-toxic, odourless anti-corrosive shield is left behind to give long term protection and lubrication of all sliding and rolling elements, which will not drip or fling off, making it ideal for bearings, gears, cables, pulleys, pumps, valves, hinges, linkages and chains. Totally repels warm, hot, salt or fresh water, is non-melting and withstands temperatures of -40°C to 360°C. Contains no mineral hydrocarbons and is compatible with all other greases. A fully synthetic food safe lubricant complying with EEC regulations and formulated entirely with FDA USDA HI approved ingredients for the Food, Poultry, Meat, Beverage and Pharmaceutical Industries. Zenox Superior Lubricant offers superior protection, superior performance and superior levels of food safety. AQIS and food allergen approved.

## 250g - Z021 Dry Silicone Food Spray

A dry film lubricant for precision instruments, sliding and rolling mechanisms. Will not freeze, melt or wash off. Does not attack any engineering material, is nonstaining and non toxic. Reduces wear, does not dry up, prevents sticking and is an excellent separating and mould release agent. AQIS and food allergen approved.

## 250g - Z095 High Voltage Insulator Protector

A dry film lubricant for precision Zenox High Voltage Insulator Protector has been scientifically formulated for use on high voltage insulators to provide the ultimate protection and prevent flashover and arcing. The lubricant is non toxic, non corrosive, non staining and transparent. The protective coating will water proof and is highly resistant to penetration by salt water, humidity and airborne contaminants. Provides the ultimate protection in all weather conditions. Prior to applying clean all surfaces of dust, wax and grease. 'Do not use soaps, which act as a release agent and makes good adhesion impossible'.

Apply liberally to the entire surface for the ultimate protection.

## 400g - Z017 Moly Chain Lube

Zenox Moly Chain Lube reinforced with Molybdenum Disulphide has a friction coefficient which is lower than any conventional lubricants and provides a very high penetrative lubrication where high speeds, temperatures and loads are encountered. Through friction, it forms a lubricating film which is tough, heat resistant, salt and pressure resistant. Will not wash out, and protects mechanical parts from wear, seizure and gouging.

## 500g - Z019 Cold Galvanising Zinc Rich Spray

Zenox forms a flexible zinc rich coating that is 90% zinc in dry film giving long life protection and a self sacrificing protective barrier. It is closer to the colour of galvanised steel and is fast drying.
